2.	ship was in the Kola Inlet en route to 25X1  Murmarst. Just inside Tyuva Bay (N 69-10, E 33-42), on the north side, there was a large icehouse, with a trough running down to the quay where the trawlers take on ice. At the bottom of the bay, also on the north side, there was an apparently new quay with three or four warehouses.  25X1  On an islet east of Yekaterininskiy Island (N 69-27, E 33-27) there were seven guns in a row. They were not mounted on wheels								
	on the heights of Yekaterininskiy Island there were seven to nine guns.							2	25)
3.	many naval vessals were observed from the mouth of Kola Bay as far over as Sedlovatyy Island (N 69-15, E 33-29).  [Ive different types of ships:							-29).	25) 25)
		a. Two very large vessels exactly alike and at least 150 meters long. All the way forward there were two small guns, side-by-side behind splinter shields. Aft of tages came two turrets in the usual position with two guns in each turret. The bridge had a large grill-tower with a spherical object on top, and a large number of instruments. There was a break from the forecastle to the maindeck at the bridge. Pairs of antiair-craft guns were located between the bridge and the stacks. There were four two-gun turrets aft of the stacks. (See sketch No. 1 on page 2)

4. North of Vayenga Bay, either on Hill 405 or on the hill at Stolkovyy Point (N 69-07, E 33-26);
a radar station. It consisted of a framework about 15 meters high bearing an object resembling a four-bladed propeller. The blades were oval cupshaped sceens about five meters high and slightly longer. The screen was vertical. (See sketch No. 2 on page 2) The propeller turned slowly, probably making one revolution every one and one-half to two seconds.

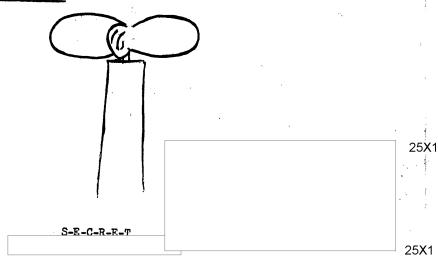

two naval vessels in the inlet. One was a destroyer and the other was a minesweeper

6. At the dockyard in Rosta there was a large naval vessel, probably a cruiser
On the bow of the vessel was a stripe of red
lead about two meters wide.

7. ship went near Letinskiy Point. In the bay west of the point there were five or six barracks along the water front, and near them were two or three pipe-masts. The installation resembled a radio transmitting station.

## Sketch No. 2: Sketch of Radar Installation:

Approved For Release 2008/07/07: CIA-RDP80-00810A006100200010-4
